PROFESSIONAL SUMMARY

Full-Stack Developer with 1.5+ years of experience building and deploying scalable web applications using the MERN stack, TypeScript, and Next.js. Experienced across the full software development lifecycle, from responsive UI to REST API and database design, real-time systems, and production deployments. Recently focused on integrating AI/LLM features into full-stack products, including a published open-source CLI tool.

TECHNICAL SKILLS

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, JavaScript (ES6+), TypeScript

Backend: Node.js, Express.js, REST APIs, WebSockets, Socket.IO

Databases: MongoDB, PostgreSQL, Prisma ORM, MySQL, Redis, Firebase

AI / Automation: LLM API integration (Gemini), AI-powered chatbots, WhatsApp & Instagram automation

DevOps & Tooling: Git, GitHub Actions (CI/CD), Docker, JWT & OAuth (Google), Postman, Vitest, Supertest, Zod

Languages: JavaScript, TypeScript, Python, Java, C++

Core CS: Data Structures & Algorithms, Computer Networking, System Design fundamentals

WORK EXPERIENCE

Full Stack Developer — Venora Technology, Delhi

Dec 2025 – Present

- Design and deploy full-stack web applications end-to-end using React, Node.js, and MongoDB.
- Manage production deployments and ensure high availability of client-facing projects.
- Collaborate directly with clients to translate requirements into scalable technical solutions.

Full Stack Developer, Internship — E-sutra Technology, Delhi

Sep 2025 – Dec 2025

- Built and deployed full-stack applications handling both frontend and backend responsibilities.
- Contributed to multiple organization projects, taking features from development through to production.

Web Developer, Internship — Slog Solution, Dehradun

Jun 2024 – Dec 2024

- Engineered market-ready full-stack websites using the MERN stack (React, Node.js, Express.js, MongoDB).
- Delivered time-sensitive client projects by translating feature requests into functional, scalable code.
- Gained hands-on experience with REST APIs, authentication, and database design.

Technical Interviewer — Masai School (Virtual)

Feb 2023 – Jun 2024

- Conducted MERN stack technical interviews, evaluating candidates on JavaScript, React, and Node.js.
- Provided actionable feedback to candidates on interview strategy and technical gaps.

PROJECTS

AutoStack AI — Scaffolding CLI + AI Feature Generator

Node.js, Express, CLI, Gemini API

- Built and published an npm CLI (npx autostack-ai) that scaffolds a production-ready Node.js/Express backend with JWT auth, Google OAuth, Socket.IO, Nodemailer, and security middleware (Helmet, CORS, rate limiting) pre-wired.
- Shipped with Vitest/Supertest test suites, Docker configuration, and a working GitHub Actions CI pipeline.
- Developed an AI-powered add-feature command that reads existing codebase conventions and calls the Gemini API to generate matching routes automatically.

WhatsApp & Instagram Chat Agent

Node.js, Express, LLM API, Webhooks, MongoDB

- Integrated WhatsApp Business API and Instagram Messaging API via webhooks to handle inbound customer messages.
- Used an LLM to generate context-aware, on-brand replies, automating FAQs, lead capture, and order-status lookups.
- Built MongoDB-backed conversation history to support multi-turn context across sessions.

MyMoney — Peer-to-Peer Money Transfer App

React, Express.js, MongoDB, Tailwind CSS

- Built a Paytm-style P2P money transfer app with JWT-based authentication and real-time balance updates.
- Implemented atomic MongoDB transactions to prevent partial transfers on failure.

Blogify — Full-Stack Blogging Platform

React, Express.js, MongoDB, REST API

- Developed a blogging platform with post creation, editing, commenting, and role-based access control.
- Built a RESTful API with Express and MongoDB for CRUD operations on posts and comments.

Mr. Chef — Food Ordering App

React, JSON Server, REST API

- Built a food ordering UI with dynamic product listings, cart management, and a responsive interface.

Nykaa Clone — E-Commerce Platform

React, Node.js, MongoDB

- Built a user/admin authentication system with CRUD operations for cart and order management.

EDUCATION

B.Tech, Computer Science & Engineering — GRD Institute of Management and Technology, Dehradun

2023 – 2026

CGPA: 7.00 / 10

Senior Secondary (XII), Science — DAV Public School, CBSE

2020

83.60%

Secondary (X) — DAV Public School, Dehradun, CBSE

2018

92.00%

ACHIEVEMENTS

- Secured 1st place in the Ramkrishna Mission Ashram Inter-College Debate Competition.
